

Number Sense Expectations

1	2	3	4	5	6
<input type="checkbox"/> I can read my numbers to 100	<input type="checkbox"/> I can read number words to twenty.	<input type="checkbox"/> I can read numbers to 1000.	<input type="checkbox"/> I can read numbers from 0.01 to 10,000	<input type="checkbox"/> I can read numbers from 0.001 to 100,000	<input type="checkbox"/> I can read numbers from 0.001 to 1,000,000
<input type="checkbox"/> I can print my numbers to 100	<input type="checkbox"/> I can print number words to 20.	<input type="checkbox"/> I can print numbers to 1000.	<input type="checkbox"/> I can read and write numbers to 10,000 in standard, expanded and written form.	<input type="checkbox"/> I can read and write numbers to 100,000 in standard, expanded and written form.	<input type="checkbox"/> I can read and write numbers to 1,000,000 in standard, expanded and written form.
<input type="checkbox"/> I can count by 1's to 100.	<input type="checkbox"/> I can count to 1000.	<input type="checkbox"/> I can read number words to 100.	<input type="checkbox"/> I can count by 3,4,6,7,8,9's to 100.	<input type="checkbox"/> I can estimate numbers of objects in practical situations.	<input type="checkbox"/> I can represent place value from 0.01 to 1,000,000
<input type="checkbox"/> I can count backwards from 10.	<input type="checkbox"/> I can count backwards from 20.	<input type="checkbox"/> I can print number words to 100.	<input type="checkbox"/> I can represent place value from 0.01 to 10,000	<input type="checkbox"/> I can represent place value from 0.001 to 100,000	<input type="checkbox"/> I can compare numbers between 0.001 and 1,00,000 and put them in order.
<input type="checkbox"/> I can find numbers to 10 on a number line.	<input type="checkbox"/> I can find numbers to 50 on a number line.	<input type="checkbox"/> I can count backwards by 2's from 100.	<input type="checkbox"/> I can compare numbers between 0.01 and 10,000 and put them in order.	<input type="checkbox"/> I can compare numbers between 0.001 and 100,000 and put them in order.	

<input type="checkbox"/> I can tell which numbers are larger or smaller to 50.	<input type="checkbox"/> I can compare numbers to 50.	<input type="checkbox"/> I can count backwards by 5's from 100.			
<input type="checkbox"/> I can put numbers to 50 in order.	<input type="checkbox"/> I can put numbers to 100 in order.	<input type="checkbox"/> I can count backwards by 10's from 100.			
<input type="checkbox"/> I can represent numbers to 50.	<input type="checkbox"/> I can represent numbers to 100.	<input type="checkbox"/> I can find numbers to 100 on a number line.			
<input type="checkbox"/> I can identify and describe numbers to 50.	<input type="checkbox"/> I can identify place value patterns.	<input type="checkbox"/> I can identify what comes before and after in a pattern where I am counting by 2's.			
<input type="checkbox"/> I can group items in 10's and 1's.	<input type="checkbox"/> I can use a calculator with numbers larger than 50.	<input type="checkbox"/> I can identify what comes before and after in a pattern where I am counting by 5's.			
<input type="checkbox"/> I can use a calculator with numbers smaller than 10.	<input type="checkbox"/> I can use ordinal numbers to the 31 st .	<input type="checkbox"/> I can identify what comes before and after in a pattern where I am counting by 10's.			

<input type="checkbox"/> I can use ordinal numbers to 10 th .		<input type="checkbox"/> I can identify and describe numbers to 1000.	
<input type="checkbox"/> I can estimate numbers and check by counting.		<input type="checkbox"/> I can model numbers grouped in 100's, 10's and 1's.	
		<input type="checkbox"/> I can use a calculator to explore number patterns.	
		<input type="checkbox"/> I can use ordinal numbers to the 100 th .
